
CLASSROOM CONNECTIONS

The photograph in the middle is from a primary school in the UK. The children in that classroom have connections to people and places all over the world.

What affect do the children in *your* classroom have on people and places around the world? Draw arrows from the middle photo to a place which might be affected.

What affect do other people and places have on your classroom? Draw arrows into the centre from places around the edge which might have an affect.

What other connections might there be?
